Summary

AI product and learning-technology designer (Ed.M., Harvard Graduate School of Education, May 2026) with hands-on experience in AIGC product research, model output evaluation, and applying text, image, and video generation models to advertising and e-commerce scenarios. Experienced in product prototyping, frontend interaction design, multi-agent workflows, and translating findings into ad campaign KPIs and data-informed product recommendations. Skilled at coordinating cross-functional teams for requirement tracking, launch readiness, and commercialization of AIGC solutions. Available to onboard late July 2026.

Education

Harvard Graduate School of Education

May 2025 - May 2026

Ed.M. (STEM-eligible) Learning Design, Innovation, and Technology (LDIT)

University of Wisconsin-Madison

Jan 2021 - Dec 2024

B.S. Education Studies

Minors: Communication Arts, Digital Studies, Game Design

Work

Assistant AIGC Product Manager Aug 2023 - Present

Bodao Technology Co., Ltd. | Beijing, China (Hybrid)

- Analyzed industry trends and leveraged business acumen to identify new opportunities for AIGC products, driving innovation and user adoption, ensuring market alignment and competitive advantage.
- Managed the design and development lifecycle for AIGC products, from concept to launch.
- Evaluated performance metrics and end-to-end student workflows for an e-commerce AIGC training platform (TaskMate), mapping task submission, campaign-context selection, multi-agent collaboration, AI-output storage, review reporting, and teacher handoff to identify UX friction and improve review efficiency.
- Provided structured product feedback and frontend interaction design recommendations for onboarding flows, prompt guidance, answer-mode design, feature taxonomy, navigation logic, file-upload interactions, and error-state messaging—streamlining onboarding and reducing user friction.
- Analyzed 18 students' e-commerce livestreaming performance data and recommended content and engagement strategies that contributed to an average 400% increase in views.
- Trained the BoTok Edu recommender and co-designed Botrix (a 2.5D gamified retail simulation in Unity) to support prototype testing, iterative product development, and validation of recommender outputs.
- Coordinated cross-functional prototyping cycles with engineers and instructors to track requirements, readiness, and handoff for pilot launches; documented feedback loops to support product commercialization.

Founding Organizer

Sep 2025 - Nov 2025

China Education Symposium (CES), Harvard Graduate School of Education | Cambridge, MA

- Co-organized an education and cultural forum on intangible cultural heritage education reaching 500+ participants across multiple platforms.
- Managed coordination for four guest speakers, including outreach, cross-time-zone communication, material collection, preparation meetings, rehearsal scheduling, and live event execution.
- Drafted bilingual content, speaker introductions, and audience-facing materials for social media and event channels; collected participant feedback and summarized takeaways for post-event review.

Graduate Assistant, Equity Workshop (GAEW) Producer

Aug 2023 - Dec 2024

UW-Madison Division of Diversity, Equity & Educational Achievement | Madison, WI

- Produced and managed 30+ Zoom workshops across multiple semesters, distributing materials and supporting 3,000+ academic staff and students.
- Collaborated with eight departments to deliver accurate training content and ensure alignment with institutional goals.
- Updated WordPress pages and managed 12+ official administrative communications to maintain stakeholder engagement and event logistics.

Additional Experience

Summer 2023 – 2024

The Confucius Institute at Chiang Mai University; Finance and Trade School of Dali | China, Thailand

- Supported a Chinese + e-commerce training program serving 100+ students through curriculum support and project evaluation.
- Created 10+ instructional video materials to support livestreaming and e-commerce skill development.
- Facilitated 25 student representatives in evaluating livestreaming projects and synthesized feedback to inform instructional improvement

Project

AI Product Designer

Feb 2026 - May 2026

Teacher Reflection Lab | MIT: Education Technology Studio

- Designed an AI-supported reflection platform using Big Five–based teaching personality assessment and classroom scenarios to support novice teacher communication, reflection, and professional self-efficacy.
- Developed product logic for user intake, scenario response, reflective feedback, and professional growth tracking to guide iterative prototyping and user testing.

Vibe-Coded Learning Game Designer

Mar 2026 - Apr 2026

Word Cross: Wordy | Harvard: Transforming Education Through Emerging Technologies

- Designed interactions for vocabulary recall, clue interpretation, multimodal learning, repeated low-stakes practice.
- Created a vibe-coded crossword-style English learning game with audio, translation, and image API concepts to support multimodal vocabulary practice.

Designer

Oct 2025 - Nov 2025

Table Craft | Harvard: Vibe Coding

- Built an LLM-supported data visualization tool that recognizes data categories and converts datasets into user-facing visuals (bar charts, pie charts, skills charts) to improve data interpretability.
- Integrated LLM APIs for natural-language prompts to map datasets to visualization types and iterated on prompt designs to improve output reliability.

Designer

Nov 2025 - Dec 2025

EdTech Analyzer | Harvard: Vibe Coding

- Built a decision-support website that helps users evaluate education-technology tools through structured analysis reports and interactive criteria to support evidence-based adoption decisions.

Learning Designer

Sep 2025 - Dec 2025

Redesigning How People Learn for Parents | Harvard: Teaching and Learning Lab Practicum

- Collaborated with Harvard's Teaching and Learning Lab to redesign How People Learn for parent learners using needs analysis, backwards design, and ADDIE-informed logical thinking.
- Developed parent personas, learner journeys, and accessible online learning activities by translating user needs and stakeholder feedback into audience-specific experiences.

Comparative AI Product Researcher and Analyst

Sep 2025 - Dec 2025

Paper: Algorithm-based Tutoring: Gauth and Doubao-Aixue | MIT: Learning, Media, and Technology

- Compared Gauth and Doubao-Aixue as AI tutoring products across U.S. and Chinese education markets

- Utilized analytical skills to identify how policy context, user expectations, marketing solutions, and platform positioning shape product design.

AI Product Researcher and Analyst

Sep 2025 - Dec 2025

Paper: Khanmigo Writing Coach: Instructionist and Constructionist Analysis | MIT: Learning, Media, and Technology

- Analyzed how an AI writing tool supports feedback, learner agency, scaffolding, and writing development through learning-theory frameworks.

AI Product Researcher and Analyst

Sep 2025 - Dec 2025

Paper: Recommendation Memo: Applying AI Coding Tools in Game Design | MIT: Learning, Media, and Technology

- Evaluated educational value, implementation risks, and adoption conditions of AI coding tools in project-based game-design learning.

Media Researcher

Sep 2025 - Dec 2025

Content Analysis of Video Programming | Harvard: Growing Up in a Media World

- Conducted content analysis of video programming to examine media messages, representation patterns, and children's media environments.

Game Designer

Sep 2025 - Dec 2025

Between Us | Harvard: Designing for Learning by Creating

- Developed an interactive game prototype to help players build closer interpersonal connections through guided questioning, turn-taking, and shared reflection.
- Designed a two-stage flow where players first respond to system-provided questions, then personalize questions for others; iterated on question design and facilitation rules to support participation and emotional safety.

AR Experience Designer

Mar 2026 - Apr 2026

Guess the Library | Harvard: Transforming Education Through Emerging Technologies

- Created an AR experience to support interactive exploration of Harvard libraries through visual clues and location-based discovery.

Game Designer

Oct 2024 - Dec 2024

Ninja: Retribution | UW-Madison: Game Design

- Designed 24+ 2D assets and tilemaps, managed asset sharing through Discord and GitHub, and optimized asset integration in Godot.

Skills

Product & AI: AI-assisted prototyping, Prompt iteration, Ad/campaign platform delivery, Model output evaluation, Product metrics / KPIs, Ad / campaign performance analysis, AIGC product research, LLM workflow design, LLM API integration

Data & Research: Data analysis, R Studio, Excel, Survey design, Content analysis, Data cleaning, Product feedback synthesis, Tableau

Interaction & Design: Interaction design, AR Studio, Figma, Unity, Godot, Adobe Creative Suite (Photoshop, After Effects, Premiere, Audition)

Tools: Codex, Claude, Gemini, Loveable, Replit, Figma, Cap Cut, GitHub, VS Code, WordPress.

Languages: Mandarin Chinese, English
