

Teacher Version Big Five Guide

Reference file for updating the teacher identity result-page content and formatting. Keep the quiz flow, scoring logic, personality calculation, and simulation entry flow unchanged.

Design goal

This guide should feel visually aligned with the Sean’s Number Simulation Script: clean, readable, structured, and implementation-ready. The content should support a result page that feels reflective and specific without sounding clinical or diagnostic.

The page should explain each teacher identity through a short overview, visible strengths, and concrete growth edges. It should help teachers recognize a teaching tendency, not label their entire personality.

1. Scope

Use this PDF as the source of truth for the six teacher identity result pages. It does not replace the scoring guide. The scoring guide still controls the 20 questions, reverse scoring, Big Five trait calculations, and six-type classification algorithm.

What stays the same

- Existing quiz flow, scoring logic, page structure, interaction flow, and animation style.
- Six teacher type names, signature colors, formulas, and primary/secondary type logic.
- Trait score display and the “Your Teaching Soul / Enter the Simulation” section.

What changes

- Replace the current identity result-page content with the six identity sections in this file.
- Split Identity Overview into short readable paragraphs instead of one large paragraph.
- Show Natural Strengths / Natural Threads and Growth Edge as bullet lists.
- Remove any separate Scenario in Practice block and any separate Why You Matched This Type block if they appear in the current website.

2. Website formatting rules

- Use the Identity Overview as the main explanatory section for the result page.
- Keep bold highlights inside the Identity Overview to make the most important ideas easier to scan.
- Natural Strengths / Natural Threads should use readable green for both heading and normal-weight bullet text.
- Growth Edge should use readable amber/yellow-orange for both heading and normal-weight bullet text.
- The primary teacher type name in the result header should use its signature color instead of black.
- Avoid emojis or decorative icons inside the Strengths and Growth sections.

Recommended text colors

Section use	Suggested color
Natural Strengths / Natural Threads heading + bullet text	#2E7D5B
Growth Edge heading + bullet text	#B86B00

3. Six type reference

Teacher Type	Signature Color	Formula
Community Energizer	#FF6B5A	$0.40 * E + 0.40 * A + 0.20 * O$
Structured Guide	#2F5D8C	$0.45 * C + 0.35 * \text{Emotional Stability} + 0.20 * A$
Creative Explorer	#8B5CF6	$0.50 * O + 0.25 * E + 0.25 * C$
Steady Supporter	#6BAF8A	$0.45 * A + 0.40 * \text{Emotional Stability} + 0.15 * C$
Reflective Designer	#2A9D8F	$0.45 * O + 0.40 * C + 0.15 * \text{Emotional Stability}$
Quiet Specialist	#5B5F97	$0.40 * (100 - E) + 0.35 * C + 0.25 * O$

Community Energizer

Signature color: #FF6B5A Formula: $0.40 * E + 0.40 * A + 0.20 * O$

Identity Overview

A Community Energizer teaches through social warmth, momentum, and belonging. This identity means you often help the classroom feel alive by starting conversations, reading the emotional temperature of the room, and making participation feel less intimidating.

In practice, this may look like beginning class with a quick check-in, noticing when the room feels flat, or helping a quiet group restart a discussion with a low-pressure prompt. Your strength is not just being energetic; it is using that energy to build connection and move people into shared learning.

This type suggests that students may remember the atmosphere you create. They may experience your class as a place where they are invited in, noticed, and encouraged to contribute.

Natural Strengths / Natural Threads

- Builds rapport quickly with students, families, and colleagues.
- Makes discussions, group work, and community moments feel more approachable.
- Can re-energize a room when students feel disconnected, shy, or unsure.
- Helps classroom culture feel warm, relational, and participatory.

Growth Edge

- Leave enough quiet processing time for students who do not respond immediately.
- Avoid reading silence as disengagement too quickly.
- Protect your own social energy so you do not overextend yourself.
- Balance lively participation with slower, more reflective ways to contribute.

Structured Guide

Signature color: #2F5D8C Formula: $0.45 * C + 0.35 * \text{Emotional Stability} + 0.20 * A$

Identity Overview

A Structured Guide creates safety through clarity, preparation, and steadiness. This identity means you tend to support students by making expectations, routines, materials, and next steps easier to understand.

In practice, this may look like preparing a visible agenda, breaking a messy project into smaller steps, or calmly resetting the class when an activity starts to drift. Your structure helps students spend less energy guessing what to do and more energy engaging with the work.

This type suggests that your reliability can become a form of care. Students may feel grounded because they know what to expect from you and trust that you can guide the room back on track.

Natural Strengths / Natural Threads

- Creates predictable routines and clear expectations.
- Keeps track of details, deadlines, materials, and follow-ups.
- Helps students navigate complex tasks by breaking them into workable steps.
- Stays steady when the classroom becomes busy or uncertain.

Growth Edge

- Build flexibility into your plans before the unexpected happens.
- Watch for moments when a teachable detour may be worth taking.
- Avoid treating disruption as failure when it may be useful feedback.
- Keep the structure firm enough to support learning, but soft enough to adapt.

Creative Explorer

Signature color: #8B5CF6 Formula: $0.50 * O + 0.25 * E + 0.25 * C$

Identity Overview

A Creative Explorer sees teaching as a space for experimentation, imagination, and fresh entry points. This identity means you are likely energized by new tools, unusual formats, metaphors, interdisciplinary links, and redesigned learning experiences.

In practice, this may look like turning a reading activity into a design challenge, explaining an abstract concept with a visual analogy, or testing a new classroom format because you are curious about how students might respond. You help students see that learning can be flexible, surprising, and creative.

This type suggests that you may be especially powerful when students feel bored, stuck, or disconnected from traditional instruction. Your creativity can open another door into the same learning goal.

Natural Strengths / Natural Threads

- Generates fresh ideas for lessons, activities, and learning tools.
- Connects concepts across subjects, media, and real-world contexts.
- Makes familiar content feel new through metaphor, story, design, or play.
- Encourages curiosity and experimentation in students.

Growth Edge

- Choose the strongest ideas instead of trying to use every interesting possibility.
- Add enough structure so creative activities do not become confusing.
- Check whether the novelty is serving the learning goal.
- Make your experiments sustainable for both you and the students.

Steady Supporter

Signature color: #6BAF8A Formula: $0.45 * A + 0.40 * \text{Emotional Stability} + 0.15 * C$

Identity Overview

A Steady Supporter teaches through patience, care, and emotional grounding. This identity means you are likely attentive to students who are overwhelmed, frustrated, withdrawn, or quietly asking for help.

In practice, this may look like softening your tone during a conflict, giving a student space to reset, or checking in privately after a hard moment. You do not ignore behavior, but you often respond in a way that separates the student's worth from the student's mistake.

This type suggests that students may experience you as someone safe to return to after difficulty. Your steadiness can help them regulate, repair, and take risks again.

Natural Strengths / Natural Threads

- Creates emotional safety and trust.
- Supports students through conflict, frustration, or uncertainty.
- Uses patience and calm presence to de-escalate difficult moments.
- Builds relationships through listening, repair, and consistency.

Growth Edge

- Set emotional boundaries so care remains sustainable.
- Avoid carrying every student problem as your personal responsibility.
- Practice making firm decisions even when they may disappoint someone.
- Remember that support can include both warmth and limits.

Reflective Designer

Signature color: #2A9D8F Formula: $0.45 * O + 0.40 * C + 0.15 * \text{Emotional Stability}$

Identity Overview

A Reflective Designer approaches teaching as an intentional design process. This identity means you like to understand why a learning experience worked, why it failed, and how it could be improved next time.

In practice, this may look like revising a lesson after noticing where students got stuck, comparing two activity structures, or redesigning an assessment so it better matches the learning goal. You are not only asking, “Did this work?” You are asking, “What pattern does this reveal, and what should I change?”

This type suggests that your teaching can grow stronger over time because you treat practice as something that can be studied, tested, and redesigned.

Natural Strengths / Natural Threads

- Connects big-picture learning goals to practical classroom choices.
- Uses reflection to improve lessons, projects, routines, and assessments.
- Notices patterns in student confusion, engagement, or progress.
- Turns feedback into purposeful design changes.

Growth Edge

- Avoid over-refining before testing the next version.
- Do not let reflection become a waiting room for action.
- Set limits on how much something needs to be improved before trying it.
- Use small prototypes instead of trying to perfect the whole system at once.

Quiet Specialist

Signature color: #5B5F97 Formula: $0.40 * (100 - E) + 0.35 * C + 0.25 * O$

Identity Overview

A Quiet Specialist brings depth, observation, and careful preparation rather than constant visibility. This identity means you may not always seek the spotlight, but you often notice details that others miss and prepare supports that make learning smoother.

In practice, this may look like designing a scaffold before class, tracking a student's pattern over time, or giving precise feedback that helps a learner make a real step forward. Your influence may be quieter, but it can be deeply meaningful.

This type suggests that your teaching strength may show up in the details: a clear example, a thoughtful comment, a well-timed adjustment, or a support structure that prevents confusion before it starts.

Natural Strengths / Natural Threads

- Prepares deeply and notices subtle student needs.
- Designs thoughtful scaffolds, examples, and feedback.
- Supports students through careful observation and individualized attention.
- Brings expertise and focus to moments that require precision.

Growth Edge

- Make your thinking visible when others would benefit from it.
- Share expertise at the right moments instead of keeping it hidden.
- Avoid assuming quiet contribution is always understood by the group.
- Practice entering visible leadership without becoming performative.

4. Implementation checklist

Use this checklist when updating the website so the result page stays aligned with the Sean's Number Simulation Script style and avoids drifting back into a dense paragraph layout.

- Identity Overview is split into short paragraphs with selective bold highlights.
- Natural Strengths / Natural Threads appears as green bullet points with normal-weight body text.
- Growth Edge appears as amber/yellow-orange bullet points with normal-weight body text.
- The primary teacher type name uses its signature color in the header area.
- The chart or visual diagram continues to use the primary teacher type signature color as the dominant color.
- No separate Scenario in Practice block appears on the result page.
- No separate Why You Matched This Type block appears if that section has already been removed.
